## WORK EXPERIENCE

### ASE Accenture [Java Full Stack Developer]

- Completed training on Java full stack developer.
- Worked on a case study and get to know how to extend features, fix bugs, optimize code, and test code using JUnit.
- Learned business ethics and worked under the development team.
- During this training learned Java, JSP, Servlet, Spring, Spring-MVC, JDBC, MySQL.
- Develop project Using HTML, CSS, Bootstrap, JSP, Servlet, JDBC, and MySQL.

### Trillo Tourist Guide [Internship at YoursOwn Insticram Systems Pvt. Ltd.]

- During this internship we designed UI of Tourist guide from desktop view to mobile view.
- Technologies used – HTML, SCSS and Bootstrap. [GitHub](#)

## PROJECTS

### Connect Coder [Android]

- The main objective of Connect Coder app is to help coders to communicate and share their thoughts with the coding community, gain knowledge and share trending technologies.
- This application will help a lot of coders to share, ask and resolve their problems at the earliest possible.
- Users can communicate through direct message, post their codes, in the code hub section and also search specific professions.
- This app is designed using Kotlin, XML, and Firebase. [GitHub](#)

### Newsly [Android]

- It's an android app designed using XML and kotlin. Through this app, users can read the latest news. Here, I have used an API call from newsapi.org. [GitHub](#)

### Library Management System [Web]

- Library Management system was designed to automate the library work in our college.
- In this project, we created two sides one is the librarian side and another is the user side. Admin can maintain all the records like adding books, issue books, maintaining all user's records, etc.
- After registration users can search for books, request for the issue, return books, etc. [GitHub](#)
